

50 BOOKS BEFORE BIRTH

Your baby may not be able to interact with you just yet, but that doesn't mean you can't get started with the bonding process. One great way to bond with your little one is by sharing a good book!

Though your baby will know your voice well by the time they are born, sitting down and reading a book to your bump gives you a chance to focus on your little one and build a new kind of connection.

Your partner and older children can get involved, too, giving baby an opportunity to learn the voices of all the important people in their life!
